Learn about **green building and climate change** in a special presentation by:

EDWARD MAZRIA, AIA
 Founder and Executive Director, Architecture 2030
www.architecture2030.org

Nation Under Siege

We are at the crossroads of the most significant crisis of modern times. Two profound, life-changing events – the rapid depletion of fossil fuels and rising sea level from the warming of the earth’s atmosphere – are converging to dramatically alter our future.

Hear from Edward Mazria, founder of Architecture 2030, as he unveils a new study of sea level rise showing fly-over 3D images depicting the potentially calamitous coastal and national impacts of these events. Then learn of the historic role we must play in addressing this crisis and a solution that is based on available means and measurable results.

Location: **UCSD Price Center Ballroom**
 Date and Time: **Monday, October 29, 2007**
Reception: 5:30 p.m.
 (hors d'oeuvres will be served)
Program: 6 to 7:30 p.m.
 Information and Registration: **www.unitedgreen.org**
 or
UCSD Box Office
