

Advanced Perspectives on Implementation

CALGreen for “Designers”

Friday, June 24, 2011 8:30am-4pm

Hosted at California Center for Sustainable Energy, 8690 Balboa Avenue, San Diego, CA 92117

Get the inside scoop on the newly adopted CALGreen code!

Hear how local design firms are meeting (and beating!) the new code requirements!

Special Bonus: Dialogue with plan review staff from local planning departments!

Presentations include architectural, energy-efficient building systems, and site-design strategies that meet the CALGreen code.*

*This presentation is NOT intended to be a review of the CALGreen requirements, item by item, but rather a focus on some of the basic and more advanced design requirements associated with the new code. You want to know how CALGreen is affecting plan review and being enforced! You'll find it here! City reps, architects, and engineers will share their expectations, generally acceptable solutions, and best practices.

Authored by:

Architects | Delawie Wilkes Rodrigues Barker

Tory R. Walker Engineering, Inc.

Nabil Chehade, City of San Diego

Andrew McGuire, Chula Vista

Brummitt Energy Associates

And reps from Del Mar and the County!

A minimum of four (4) AIA CES LUs (SD units!) will be offered! Boxed lunch provided!

To register, visit the www.aiasandiego.org/event and click on the date June 24.

An online registration link is provided there.
